

Update Docker for Windows

Step 1: Browse through the list of updates.

Step 2: Click on Install, wait a couple of minutes.

Docker will shutdown, and after the update it will restart.

Step 3: After restart, right click on Docker icon, choose About Docker.

Step 4: Confirm that you have the latest version.

Step 5: Start Command Prompt.

Step 6: Write the following command: **docker version**, click Enter.

Step 7: Confirm that you have the latest version.

```
Administrator: Command Prompt
